- **Households** (households of the persons being Census units) and

- **Dwellings** (dwellings in a narrow sense of word, inhabited business premises, improvised living quarters and collective living quarters)

4. Place of enumeration

The place of enumeration is the place of usual residence of the persons - Census units. As a rule, the persons with a place of usual residence in the Republic of Macedonia who at the Census period are absent abroad up to one year, are enumerated abroad, at the diplomatic and consular representative offices. The Census abroad was carried out by the Ministry of Foreign Affairs with co-operation with the diplomatic and consular representatives.

Due to harmonization and adjustment of the Census as statistical operation towards the standards of European and World Statistics, in the Census 2002 certain changes have been made that are in relation of defining of the Census units and calculation of the category total population. The enumeration of the Census units was conducted by **place of usual residence**, and persons with a place of usual residence in the Republic of Macedonia working abroad more than 12 months, as well as the members of their households, were not Census units.

These changes do not allow a complete compatibility of the data from this Census with the data from the previous censuses

5. Place of usual residence

Place of usual residence is the geographic place where the enumerated person usually resides. This may be the same as, or different from the place where the person actually was at the time of the Census, or it may be his/her legal residence (according to the personal document). A person's place of usual residence understands the place where he/she spends most of his/her daily or night rest.

If the persons have performed more types of work at the reference week, an occupation is defined according to the work using the largest part of working time.

In the Table 13 the data of the total Population in the Republic of Macedonia according to declaration by ethnic affiliation and citizenship, are presented.

In accordance with the Census Law, the data on the ethnic affiliation are results of the free declaration by the population in reply to this question. For this purpose in the Census questionnaire an empty line was foreseen for the question of ethnic affiliation. For children under 15 years of age, a response to this question was given by one of the parents, the adoptive parent or guardian. Neither the enumerator nor anybody else could not in any way influence the enumerated person to state his ethnic affiliation against his own will. In accordance with the Census Law, a person could, for private reasons, refrain from declaring his/her ethnic affiliation.
